WEEK 6 · DAY 3 · DEMO DAY

Peer Scoring Sheet

Two stars and a wish, against the six rubric lines.

One sheet per presenter. Score from what you **saw and heard** in the 5 minutes; the instructor scores the report and the code. Peer scores are **feedback, not grades**: kind, specific, about the work.

Presenter	Brief (A–E) and process

Rubric line	What to look for in the demo	Score
Problem framing and data	Did they name the unit, the process and who uses the tool? Is the data real, described, and kept off GitHub?	___/15
Understanding the series	Did they say what was wrong with the data and what they fixed? Is the threshold on the chart?	___/15
Method	Does the method fit the brief? Did every feature pass the leak test?	___/20
Honest evaluation	Split by time? A baseline on the same period, same scorer? Spread, repeated calls or coverage shown?	___/25
Deployment	Did it run live from the training server (or today's scheduled report)?	___/15
Communication and AI use	4 sentences with a number? Limitations said out loud? On time?	___/10

Total: _____ / 100

⭐ Star 1: one thing that was clear or clever	⭐ Star 2: one thing I'll steal for my own work	🙏 A wish: one thing that would make it stronger
